## EDUCATION

### Vignan's Institute of Information Technology, Visakhapatnam

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

CGPA: 9.19/10

**Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming.

## EXPERIENCE

### Rashtriya Ispat Nigam Limited (RINL)

May 2026 – Present

Full Stack Development Intern (J2EE & Web 2.0 Technologies)

- Engineering full-stack enterprise modules using J2EE and Web 2.0 technologies, integrating frontend and backend layers with relational database systems.
- Participating in enterprise software development lifecycle including requirement analysis, coding, testing, and deployment practices.

### Saiket Systems

Apr 2025 – May 2025

Web Development Intern

- Built responsive, production-ready web interfaces and reusable UI components adhering to clean design principles and accessibility standards.

### EduSkills Academy

Oct 2024 – Dec 2024

Full Stack Web Development Intern

- Developed JavaScript-driven application features and responsive web pages; managed version control using Git and GitHub in a collaborative team environment.

## PROJECTS

### Project Camp — RESTful Backend API for Project Management

🐙 GitHub

- Designed and implemented a RESTful API using Node.js and Express.js supporting full project lifecycle management — projects, tasks, subtasks, and notes.
- Built a three-tier role-based access control system (Admin, Project Admin, Member) with JWT authentication, refresh tokens, and secure email verification and password reset flows.
- Architected 30+ API endpoints across authentication, project, task, and notes modules with Multer-based file upload support and input validation middleware.

### BuddyBus — Real-Time College Bus Tracking System

🐙 GitHub

- Built a full-stack real-time bus tracking platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) for college transportation management.
- Integrated Google Maps API to deliver live GPS tracking, route visualization, and stop monitoring, improving transit visibility for students and administrators.

### NGO Website — Full-Stack Nonprofit Web Platform

🐙 GitHub 🌐 Live

- Developed and deployed a responsive nonprofit website with structured content sections, optimized UI components, and cross-device compatibility.
- Deployed to Netlify with CI/CD integration; applied semantic HTML5 and Tailwind CSS for accessibility and performance.

## SKILLS

### Languages

Java, Python, C, JavaScript

### Frontend

HTML5, CSS3, Tailwind CSS, Bootstrap, React.js

### Backend

Node.js, Express.js, RESTful APIs, JWT Authentication

### Database

MongoDB

### Tools

Git, GitHub, Figma, Netlify, Postman, Multer

### Core CS

Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## PUBLICATION

### Deep Reinforcement Learning for Dynamic Resource Management in Ephemeral Edge Computing Networks

Published in *IJTEST*. Explored AI-driven resource allocation and optimization strategies for ephemeral edge computing environments using reinforcement learning techniques.

## ACHIEVEMENTS & LEADERSHIP

- Solved 300+ Data Structures and Algorithms problems on LeetCode and coding platforms.
- **President, Unstop Igniters Club** — Organized coding competitions, technical workshops and student engagement initiatives.
- **Top 20 Finalist** at Sushacks Hackathon for developing the RegeniScan AR waste classification project.
- **Google Gemini Student Ambassador** promoting AI learning and community initiatives.
- Volunteer at **GDSC AP WOW 2025** supporting event coordination and community engagement.

## CERTIFICATIONS

Google Gemini Student Ambassador · GenAI Workshop — IIT Hyderabad · EduSkills Web Full Stack Internship · NPTEL — DBMS
