Career Objective

Computer Science undergraduate with practical experience in Java, JavaScript, React.js, Node.js, REST APIs, and database development. Strong foundation in data structures, algorithms, and software engineering. Seeking a Software Development Engineer role to develop scalable, efficient, and user-focused software solutions.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

CGPA: 9.17/10

Vignan's Institute of Information Technology, Visakhapatnam

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Skills

Languages	Java, Python, C, JavaScript
Frontend	HTML5, CSS3, Tailwind CSS, Bootstrap, React.js
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication
Database	MongoDB
Tools	Git, GitHub, Postman, Figma, Netlify
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Internship / Industrial Exposure

Full Stack Development Intern (J2EE & Web 2.0) – Rashtriya Ispat Nigam Limited (RINL)

May 2026 – Jul 2026

- Engineered full-stack enterprise modules using J2EE and Web 2.0 technologies, integrating frontend and backend layers with relational databases.
- Participated in the full enterprise SDLC – requirement analysis, coding, testing, and deployment.

Web Development Intern – Saiket Systems

Apr 2025 – May 2025

- Built responsive, production-ready web interfaces and reusable UI components following clean design and accessibility standards.

Full Stack Web Development Intern – EduSkills Academy

Oct 2024 – Dec 2024

- Developed JavaScript-driven application features and responsive web pages; managed version control with Git/GitHub in a collaborative team environment.

Projects

ShelfInventory – AI-Powered Inventory Tracking Platform

🔗 GitHub

- Built a full-stack inventory tracking app (**React, Node.js, Express, MongoDB**) letting users manage products/shelves and run image-based inventory scans.
- Integrated a **Python FastAPI** service with **YOLO** object detection, comparing detected vs. expected quantities to auto-flag low-stock products on a React dashboard.

Project Camp – RESTful Backend API for Project Management

🔗 GitHub

- Designed a RESTful API (**Node.js, Express.js**) supporting full project lifecycle management – projects, tasks, subtasks, and notes – across 30+ endpoints.
- Built a three-tier role-based access system (Admin, Project Admin, Member) with **JWT** auth, refresh tokens, and secure email verification/password reset flows.

SteelSenseAI – Industrial AI Monitoring Platform

🔗 GitHub 🌐 Live

- Contributed to an industrial AI monitoring platform delivering real-time machine telemetry, live IoT sensor data, and predictive-maintenance insights for steel manufacturing.
- Implemented a secure, enterprise-grade plant dashboard for engineers to track equipment health and flag failure risks before they occur.

Achievements & Leadership

- Solved 300+ Data Structures and Algorithms problems on LeetCode and other coding platforms.
- Top 20 Finalist**, Sushacks Hackathon – Built RegeniScan, an AR-based waste classification project.
- President, Unstop Igniters Club** – Led coding competitions, technical workshops, and student engagement initiatives.
- Google Gemini Student Ambassador** – Promoted AI learning and community initiatives on campus.
- Published Researcher** – "Deep Reinforcement Learning for Dynamic Resource Management in Ephemeral Edge Computing Networks," *IJTEST*.

Certifications

Google Gemini Student Ambassador | GenAI Workshop – IIT Hyderabad | EduSkills Full Stack Internship | NPTEL – DBMS
