🌐 Portfolio

Career Objective

Computer Science undergraduate with practical experience in Java, JavaScript, React.js, Node.js, REST APIs, and database development. Strong foundation in data structures, algorithms, and software engineering. Seeking a Software Development Engineer role to develop scalable, efficient, and user-focused software solutions.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

CGPA: 9.17/10

Vignan's Institute of Information Technology, Visakhapatnam

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Skills

Languages Java, Python, C, JavaScript

Frontend HTML5, CSS3, Tailwind CSS, Bootstrap, React.js

Backend Node.js, Express.js, RESTful APIs, JWT Authentication

Database MongoDB

Tools Git, GitHub, Postman, Figma, Netlify

Core CS Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Internship / Industrial Exposure

Full Stack Development Intern (J2EE & Web 2.0) – Rashtriya Ispat Nigam Limited (RINL)

May 2026 – Jul 2026

- Engineered full-stack enterprise modules using J2EE and Web 2.0 technologies, integrating frontend and backend layers with relational databases.
- Participated in the full enterprise SDLC – requirement analysis, coding, testing, and deployment.

Web Development Intern – Saiket Systems

Apr 2025 – May 2025

- Built responsive, production-ready web interfaces and reusable UI components following clean design and accessibility standards.

Full Stack Web Development Intern – EduSkills Academy

Oct 2024 – Dec 2024

- Developed JavaScript-driven application features and responsive web pages; managed version control with Git/GitHub in a collaborative team environment.

Projects

Project Camp – RESTful Backend API for Project Management

🐙 GitHub

- Designed and implemented a RESTful API using **Node.js** and **Express.js** supporting full project lifecycle management – projects, tasks, subtasks, and notes.
- Built a three-tier role-based access control system (Admin, Project Admin, Member) with **JWT** authentication, refresh tokens, and secure email verification/password reset flows.
- Architected 30+ API endpoints across authentication, project, task, and notes modules with **Multer**-based file upload support and input validation middleware.

BuddyBus – Real-Time College Bus Tracking System

🐙 GitHub

- Built a full-stack real-time bus tracking platform using the **MERN** stack (**MongoDB**, **Express.js**, **React.js**, **Node.js**) for college transportation management.
- Integrated **Google Maps API** to deliver live GPS tracking, route visualization, and stop monitoring, improving transit visibility for students and administrators.

NGO Website – Full-Stack Nonprofit Web Platform

🐙 GitHub 🌐 Live

- Developed and deployed a responsive nonprofit website with structured content sections, optimized UI components, and cross-device compatibility.
- Deployed to **Netlify** with CI/CD integration; applied semantic **HTML5** and **Tailwind CSS** for accessibility and performance.

Achievements & Leadership

- Solved 300+ Data Structures and Algorithms problems on LeetCode and other coding platforms.
- Top 20 Finalist**, Sushacks Hackathon – Built RegeniScan, an AR-based waste classification project.
- President, Unstop Igniters Club** – Led coding competitions, technical workshops, and student engagement initiatives.
- Google Gemini Student Ambassador** – Promoted AI learning and community initiatives on campus.
- Published Researcher** – "Deep Reinforcement Learning for Dynamic Resource Management in Ephemeral Edge Computing Networks," *IJTEST*.

Certifications

Google Gemini Student Ambassador | GenAI Workshop – IIT Hyderabad | EduSkills Full Stack Internship | NPTEL – DBMS
